

Mouth•Mate™

Pain-free brushing as you heal.

**Eliminates Real Pain
and Real Problems for
Orthodontic Patients**

Prevent cavities and
white spots, normally
caused by the
buildup of plaque.

Protect surgical exposure
wounds from bonded bracket
and chains when brushing.

Protect
your new
smile with
Mouth•Mate!

Mouth•Mate Oval is specifically designed to retract the cheek to clean hard to reach areas and protect an exposed tooth where both food and bacteria are most commonly found.

Mouth•Mate Benefits

Patient Benefits

- Establish good hygiene habits early with new braces and exposure surgery.
- Retract cheek to help the toothbrush clean hard to reach areas.
- Prevent cavities and white spots.
- Experience pain-free brushing if common gum sores occur.
- Protect exposure wounds from bonded bracket and chains.

Orthodontist Benefits

- Improve post hygiene at home for multi-month/year orthodontic patients.
- Reduce plaque, inflammation, and gingivitis.
- Decrease risk of developing white spots and cavities.
- Improve healing and hygiene after a surgical tooth exposure so patient doesn't disrupt the area.
- Eliminate patient's fear associated with brushing with new braces.
- Enhance patient comfort and satisfaction, which improve positive reviews on social media.

Mouth•Mate Oval
